

V101-SC Series Proval Inflatable Seated Butterfly Valves For Severely Abrasive Applications

Proval V101-SC series inflatable seated actuated butterfly valves that are highly resistant to mechanical wear are available in wafer and lug styles with seat in EPDM, Silicone, NBR or highly abrasion resistant White SBR to suit individual applications. Owing to their reduced coefficient of friction, the inflatable seated valves are capable of guaranteeing an extended life cycle and bubble tight shut-off in the most severe applications even under high operational frequencies, thus ideally suited for handling highly abrasive powders, granular materials and fluids containing solid particles. They are superior to the conventional types of butterfly valves that are prone to fail rapidly especially when used in mining applications and applications involving pneumatic conveying of powder materials.

The outside diameter of the disc that the V101-SC series valves feature is smaller compared to the standard versions thus the disc makes casual contact with the seat during valve opening and closing. When the valve disc reaches the fully closed position, the seat expands against it using pneumatic pressure, providing a tight seal. On valve opening the compressed air acting on the back of the seat is exhausted and the seat shrinks back allowing for the frictionless rotation of the disc. Discs with tungsten carbide coating for extremely abrasive media handling and discs with mirror polished surface finishing for food applications are possible upon request.

Operating Principle -Disc/Seat Positions

1.Position Valve Fully Open 2.Position Valve Fully Closed 3.Position Valve Fully Closed & Seat Inflated

Material List

No	Part Name	Material	No	Part Name	Material	No	Part Name	Material
1	Body	Epoxy Powder Coated GG25 Cast Iron	3	Seat	EPDM (-30° C ~ +130° C)	10	Lower Stem	AISI420 St.Steel
		Epoxy Powder Coated GGG40 Ductile Iron			NBR (-20° C ~ +100° C)			AISI316 St.Steel
		AISI304 St.Steel			Silicone (-30° C ~ +200° C)	11	Cover	Carbon Steel
		AISI316 St.Steel			Viton (-15° C ~ +200° C)	12	Washer	Brass
					SBR (-30° C ~ +80° C)			
2	Disc	AISI316 St.Steel	4/5/6/7/8	Bushing	Bronze / PTFE	13	Stoper	Carbon Steel
		Tungsten Carbide Coated AISI316 St.Steel	9	Upper Stem	AISI420 St.Steel	14	Bolt	St.Steel
		Electropolished AISI316 St.Steel			AISI316 St.Steel	15/16	Stem O-Ring	NBR/Viton

Dimensions (mm)

Size (DN)	DA Pn. Actuator	A	B	C	L
